- RHCSA/RHCE Certified.
- CCNA

Current Work Experience

Wells Fargo (Banking Domain)

Role: Sr. Software Engineer (Assistant Vice President)

May'20 – Till Date

- Acted under different roles from being a developer for sprints to being executing test scripts as a tester.
- Was an active member for a pilot module throughout Wells Fargo migrating around 80-90 application under moderns automated CI/CD pipeline
- Delivered multiple sprint user stories as a regular task.
- Along with regular sprint time line worked on multiple modules disintegration so as avoid dependency from other teams.
- Automated the DB scripts deployment process. From a manual process which involved review and execution, it now deploys the scripts on every merge automatically maintain the audit records for such execution.
- Being a legacy project, it had multiple standard coding practices issues. Brought down the count from around 13.5K to 2.3K
- Worked extensively on Junit Unit Testing process establishment and review in the team and completed code coverage from NIL to 68%.
- Worked for multiple production defects and supported.
- Worked on Selenium browser Automation for test data setup. For a single workflow it took around 10-15 min in average which wasted lot of product dev effort, sometimes relying on QA for same. This automation helped in achieving the same in under 2-3 mins.

Previous Work Experience

Deloitte USI (Retail Domain)

Client: Footlocker Inc.

Role: Senior Consultant / Team Lead

June'19 – Apr'20

- Requirement gathering and deliveries of sprint stories.
- Lead an end-to-end delivery for an entire module within order management system.
- Lead the critical modules of entire Refund process for the order flow.
- Integration with multiple 3rd party systems like FLX and Rakuten.
- API automation for the entire process of order placement to fulfillment.
- Reducing the dependency on third party for unit and integration testing, and thereby reducing the timeline for processing fulfillment from 30 min to 5 mins.
- Peer review for sprint stories and enforcing the standardized practices for deliveries.
- Validating the delivery functionalities through a demo dry run before stepping for a client demo.
- Zero-defect sprint deliveries under my supervision.
- Active involvement in project-based interview and recruitment process.
- Grooming and upgrading recent joiners to prepare them for sprint deliveries.
- Involved in appraisals for coachees along with providing constructive feedback.

Deloitte USI, (Healthcare Domain)

Client: Anthem Inc.

Role: Consultant / Module Lead

Description: Provision of GUI based application for enrolling the groups and its members under different available health schemes and customizable product catalog.

Feb'17 - Jun'19 Consultant

- Successful modernization of legacy mainframe-based application to Java platform and sent to production twice.
- Lead role for a module and delivered without any defect/ slippages to UAT/production. Providing the capability to expand client business of user enrollments under different schemes.
- Lead for the track for provision of an independent route, non-GUI based application to perform similar end-to-end application business flow.
- Ownership of tracking the defects to closure before final signoff for test deployment.
- Performance tuning and optimization of application by suppressing inconsistent DB call and redundant codes.
- Worked with the clients, scrum masters, BAs and team to get all the required inputs at the right time. Provided key inputs & design w.r.t major enhancements, got them approved by business & ensured the changes were ready in production within a short span of time in subsequent releases.
- Migration from SOA architecture to IBM's IMS Universal Adapter for IMS DB interaction and hence improving the latency and third-party dependency.
- Delivered multiple major enhancements and several sprint stories with test coverages.

Tata Consultancy Service Ltd, (Business and Finance Domain)

Client: Ditech

Aug'2017- Oct'2017
